SAGE Research Methods Online contains a wealth of information on research methods. Over 1,00,000 pages of content from renowned books, journals, reference materials and handbooks provide both a breadth and depth of information, allowing beginner researchers to explore research methods at a high level and more experienced researchers to drill down into specifics of their chosen method.

Researchers can explore methods concepts to help them design research projects, understand particular methods or identify a new method, conduct their research, and write up their findings. Since SRMO focuses on methodology rather than disciplines, it can be used across the social sciences, health sciences, and more.

SRMO is a research methods tool designed to help the researchers to create research projects and understand the methods behind them. SRMO's taxonomy of over 1,400 methods terms links to authoritative content, including:

- Over 600 books
- Dictionaries, encyclopedias, and handbooks
- The entire "Little Green Book" and "Little Blue Book" series
- Two major works collating a selection of journal articles
- Newly commissioned videos

Please circulate this information to all the faculty, research scholars and students to make the best use of this access facility.
