Abstract : 10th January 2020

Full Paper : 20th January 2020

E-mail: ifrsdcpu@gmail.com

'Derivative' is an instrument whose value depends on its underlying cash or physical asset. Hence it means that the value is derived from the value of the underlying assets like foreign exchange, currency, securities and commodities. The result of a derivative transaction is a transfer or exchange of specified cash flows at defined future points in time. Derivatives include forwards, futures, swap and options contracts that are of a pre-determined fixed duration, linked for the purpose of contract fulfilment, to the specified value of real or financial asset or to index of securities. Derivatives are primarily risk management tools. Trading in derivatives has now become an integral part of the global financial market. Futures, options and OTC derivatives markets are integral parts of almost all economies of the world which have reached an advanced stage of development. Such markets are likely to become important part of developing countries as well, helping them to move to the advanced stage with the passage of time. The development of a derivatives market is considered as a prerequisite for the Indian capital market to be globally competitive.

Pondicherry University

The Pondicherry University, a Central University, was established in 1985 by the Government of India through an Act of Parliament. It is an outstanding institution among Central Universities in India, with teaching and research as primary functions. The University has several unique features for dissemination and promotion of knowledge by providing instructional and research facilities. The campus is located in a sprawling area spread over seven hundred and eighty acres of land facing Bay of Bengal. The University is a member of the Association of Commonwealth Universities and has signed MOU with several foreign Universities and Institutions. A recent survey by the UGC, NAAC and several independent rating agencies has ranked the institution as one of the best in the country.

Department of Commerce

Department of Commerce, a centre for excellence- the real niche for budding academic minds, highly sophisticated infrastructure, exuberant faculties and many other features with two courses viz. Business Finance and Accounting & Taxation. The Department is presently assisted by the UGC at DRS-II level of SAP. The Department offers M.Com (Accounting & Taxation), M.Com (Business Finance), & Ph.D programmes with a total placement focus. Every year this Department attract students from not less than 15 states of the country. The Department encourages research in the field of Derivatives, Corporate Finance, Accounting, Banking & Insurance, and other related fields. 95% of the Ph.D scholars of the Department are JRF, MANF, RGNF fellowship holders, and the rest of the scholars get University fellowship. The students and research scholars of this department are placed in IIMs, IITs & other B-Schools, Reputed Universities in India & abroad, major MNCs, RBI, & other financial Institutions.

About the Seminar

The Govt. of India, based on the L.C. Gupta Committee recommendations, has allowed trading in derivatives in Indian securities market. Initially, SEBI permitted the derivative segments of two stock exchanges, NSE and BSE. Later, MCX and other commodity exchanges have been participating in derivatives markets in India. SEBI approved trading in index futures contracts based on various stock market indices such as, S&P CNX, Nifty & Sensex and commodities. Subsequently, index-based trading was permitted in options as well as individual securities.

Unresolved issues of Derivatives Market in India includes Exchange Control Issues, Insolvency Issues, Issue of Termination, Issue of Legality and Validity of the Transaction, Market instability and development, lack of warehousing and standardisation, Increased Off Balance Sheet exposure of Indian Banks, Regulatory issues and tax & legal bottlenecks.

Main Themes of the Seminar

- ❖ Trading and Risk Management Strategies
- ❖ Pricing and Valuation of Derivatives
- ❖ Black Scholes and Binomial Pricing Model
- ❖ Tax Treatment of Derivatives
