Sub:- Development of "National Technology Data Bank" - regarding.

Dear Sir,

National Research Development Corporation (NRDC) was established as a (non-profit organization) in 1953 by Government of India under section 8 of the companies Act to function as a link between scientific R&D organizations and industries to promote IPRs and transfer of technologies to entrepreneurs / startups. It has transferred about 5000 technologies in different sectors in India and abroad developed by various CSIR, DST, ICAR, ICMR, DRDO, IITs/Universities, etc. and has rich experience in technology transfer. It may be pertinent to mention here that NRDC shared about Rs 400 crores as license premia and royalty with its technology partner laboratories since its existence.

Hon'ble Minister of State of Science & Technology Dr. Y.S. Chowdary has given a statement in Parliament on 29th April, 2015 while replying to a question that NRDC develops a "National Technology Data Bank" in the country to aid the 'Make in India' initiative and also proposes to scout for technologies to be acquired, and demonstrate high risk technologies in PPP mode and extend angel funding for promising technologies.

In view of above directions by the Hon'ble Minister of Science & Technology, NRDC proposes to prepare the "National Technology Data Bank". To enable us to make the comprehensive "National Technology Data Bank", I sincerely request you to kindly send us the list of technologies available with your esteemed organisation for commercialisation to include in the National Technology Data Bank being prepared by NRDC, which would strengthen the emerging Indian Innovation eco-system. You may please send the list of technologies by e-mail to : cmdnrdc@nrdc.in

We look forward to hear from you on the above.

With kind regards,

Yours sincerely,

(Dr. H. Purushotham)
Chairman and Managing Director
