

TESTER APPLICATIONS AND WEBSITE

Sellermania is a French start-up company, headquarter based in Paris, in the e-commerce field. We develop tools that help eBay and Amazon power sellers manage their businesses. Our solutions help them increase their sales, gain time, gain margin – that is, we help them build a successful business!

The job

In phase with our company growth we are looking for a software and web tester / QA to contribute to our quality assurance of our applications.

You are involved in the functional tests execution of web interface of Sellermania suite as well as finding and following up bugs of applications. The main target of the job is to assure a zero default quality of functionalities before deployment.

Your profile

- Practice of Linux with good knowledge,
- Practice of MySQL with basic skills,
- Knowledge on automation tools like Selenium will be an added advantage.

Should be a good team player with excellent communication skills and energetic. Detail oriented you show rigor. You are internet passionate and easy to use computer tools. Ability to work with remote teams (autonomy, reporting, email and Skype communication).

Education:

UG (Any Graduate) and PG (Post Graduation not required).

Experience:

1 to 2 years of experience, fresher having personal project experience.

Salary:

According to your profile.

If you match our requirements, contact us immediately by email to carrieres@sellermania.com with « Tester-QA » as reference.

Job based in Chennai or Pondicherry to be filled in April.
