PONDICHERRY UNIVERSITY
PLACEMENT CELL

February 27, 2012

<u>**Attn:**</u> **All Final Year and Pre-Final Year Students of Pondicherry University and Affilitated Colleges.**

The Placement Cell is in receipt of the following communication from NASSCOM, Regional Office, Chennai. This is regarding the launch of **NAC & NAC-TECH 2.0** which is a national level standard online competency assessment test conducted in association with its council member companies like CTS, TCS, Infosys, Wipro and Accenture, as said in the communication.

Please go through Page 2 of this circular for further details.

The Placement Cell invites registration from all interested students who would like to take this test, purely based on their personal interest. The fees fixed by NASSCOM need to be paid for taking up this test by the individual students to NASSCOM. Details will be communicated after the last date of registration.

<u>Mode of Registration:</u>

1. Students who are interested to take up this test need to register their name in the Placement Cell on all working days, during 09.30 AM to 05.30 PM upto 2/Mar/2012. **(or)**

2. Bring out a consolidated list of students (who are interested at NAC TECH) in an excel sheet, **from each class and each course** and email it to nactechatpu@gmail.com **through the respective head of the department.**

Registrations received upto 5.30 PM on Friday, March 2, 2012 alone will be considered for registration to NAC-TECH test.

Placement Co-ordinator

Dear Sir,

Greetings from NASSCOM!

NASSCOM announces the revised launch of its NAC & NAC-TECH 2.0 a national level standard online competency assessment test conducted in association with its council member companies like CTS, TCS, Infosys, Wipro and Accenture.

The objective of this test is to standardize the fresher recruitment at campus level on pan India basis with one single test designed and endorsed by the TOP MNC'S. This would help both academia and the industry to expand their reach. While the challenge on industry side with increasing demand for talent acquisition search has been addressed by helping them to reach more campus at Tier-2 Tier-3 towns, the academia interest on providing equal employment opportunity for students in TPO MNC's from rural areas of our country has also been met.

This year so far about 35,000 engineering and Non- engineering students have taken the NAC & NAC-TEST and as anticipated the reception from rural areas have been very encouraging. In order to make this initiative even more successful we look forward to more support from leading and prominent Universities such as yours in recommending this for your students.

The assessment program has been overseen by the NAC & NAC-Tech Council comprising of Accenture, Cognizant, HCL, Infosys, TCS and Wipro. Our vendor/partner for this exercise continue to be Edutech and Aptech Assessment and Testing Solutions, who will reach out to you in the next few weeks to help plan and execute the assessment for your students, at a nominal fee.

The candidate can choose to take either Part A of the test or Part A + B.

The test fee per candidate is as follows:
*   Rs.155 for Part A of the test
*   Rs.232 for Part A + B of the test
*   Rs.60 as test center fee, if the college decides to charge the students for the same

Please refer to the website www.nac.nasscom.in/nactech<http://www.nac.nasscom.in/nactech for details of the test.
